

BIOTRONIC 23RG - FREESTANDING BIOETHANOL FIREPLACE

BIO672

The TermaTech Biotronic 23RG is an elegant and innovative automatic bioethanol fireplace that combines advanced technology with timeless Scandinavian design. With its curved front glass and large side windows, it creates a captivating panoramic effect, allowing the flames to be enjoyed from all angles. The fireplace uses advanced BEV combustion technology, ensuring clean combustion without smoke or ash. Featuring two flame levels, a remote control, and easy installation, the Biotronic 23RG is the perfect choice for adding cosiness and warmth to your home—without the need for a chimney.
